SHDSNGBRKI

SINGLE FLUE SHIELD

BRACKET INSTRUCTIONS

This guide is to assist with the instillation of the brackets for the single flue shield.

1) - The brackets come unfolded

- Fold the three tabs in opposite directions
- The tab with the riv-nut on it should be folded so that the thread of the riv-nut overhangs the body of the bracket as shown in the photo.

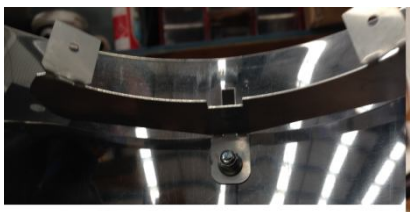

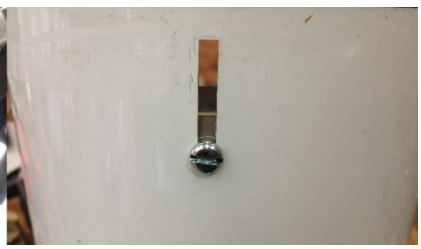

2) - Drill holes in flue and take the brackets and rivet them onto the flue using the holes in the brackets.

3) - Fasten the single shield to the bracket using the screw provided

- Adjust to the correct height and tighten

All instillations need to be installed in accordance with AS/NZS2918:2001 and the appropriate requirements of the relevant building code or codes.
